

## Mariner Calc - Spreadsheet for Mac OS X

Mariner Calc is an affordable and user friendly spreadsheet application. MS Excel documents can be opened in Mariner Calc and a Mariner Calc document can be saved into a format that MS Excel can open.

Visit the web site to learn more about Mariner's products. This tutorial assumes you understand the basic operations of a spreadsheet program.

<http://www.marinersoftware.com/>

1. Getting started. Open up the Mariner Calc folder In your applications folder and double click on the Mariner Calc application. If this is the first time you have used Mariner Calc it will ask for the serial number. See someone from the Computer Tech department or your labervisor for that number.

2. You will see a spreadsheet. The menu and button bar are on top. There are 4 button bars which you can use for common operations. Use the arrow icon to scroll through the other button bars.

3. Below the button bar and above the grid of cells which comprise your spreadsheet is the Cell editor. As you enter information into a cell it will also appear in this area.
4. Mariner Calc should take care of all your spreadsheet needs. You may want to take a look at the Preference menu to set up a few basic needs to meet your working style.
